Subject: please protect the lower snake river

greetings. i am writing to share my concern about the lower snake river and ask that you remove the existing dams in an effort to preserve the endangered salmon. it is likely that all species of salmon and steelhead in the snake river will be extinct by 2017 if the decision to remove these dams

is over-ruled. furthermore, it is a scientific fact that the best option to recover all species of salmon and steelhead on the snake river is to remove the four existing dams. by restoring the salmon and the snake river ecosystem, the region will benefit economically. (this should be an attractive reason to remove a dam.) i am close to completing four years of college and would like to make a home in the pacific northwest. i want to be

able to spend my weekends fishing in the solitude of the snake river. i want

to be able to share the experience with my children. please remove the dams.

save the salmon. sincerely, jen h.
